Cleaning and maintenance	<p>The surfaces can be easily cleaned using a soft cloth (or, alternatively a sponge or chamois) soaked in warm water and soap; a normal glass detergent can be used. Rinse well with clean water. After cleaning, the surface must be dried with a soft dry cloth.</p> <p><b>Abrasive sponges and detergents, strong alkaline substances, solvents or acids must never be used.</b></p>		
Balancing	<p>When these laminates are used to produce composite panels, it is advisable to use the same type of laminate for balancing. If this is not possible, we recommend you perform preliminary tests before deciding on PRINT HPL panels.</p>		
Tone costancy	Variations of colour can occur from one batch to another due to lacquering..	Variations of colour can occur from one batch to another due to anodising.	Variations of colour can occur from one batch to another due to lacquering or anodising. These variations are particularly evident in type 738 (Copper).
Application limits	<ul style="list-style-type: none"> <li>* Suitable for interior furnishing</li> <li>* Suitable for vertical applications</li> <li>* Attention to direction</li> <li>* Not recommended in environments with a high level of humidity</li> </ul>
